

How to run project ?

1. If you using WindowsOS you need to install 'xampp'. <https://www.apachefriends.org/download.html>.
2. After installation open xampp-control.
3. Run Apache and MySQL.
4. Start shell and login into mysql server.
5. Create database tourist;

```
CREATE DATABASE `tourist` /*!40100 DEFAULT CHARACTER SET utf8mb4 COLLATE utf8mb4_0900_ai_ci */ /*!80016 DEFAULT ENCRYPTION='N' */
```

Create tables

```
create table tourist.tourist_info
(
    id int auto_increment
        primary key,
    first_name varchar(64) null,
    last_name varchar(64) null,
    email varchar(64) null
);

create table tourist.opinions
(
    id int auto_increment
        primary key,
    id_tourist int null,
    website_opinion longtext null,
    location_opinion longtext null,
    created_date timestamp default CURRENT_TIMESTAMP null,
    constraint opinions_ibfk_1
        foreign key (id_tourist) references tourist.tourist_info (id)
);

create index id_tourist
    on tourist.opinions (id_tourist);

create table tourist.user
(
    id int auto_increment
        primary key,
    username varchar(64) null,
    password varchar(64) null
);
```

Insert credentials

```
INSERT INTO user(username,password) values(admin,admin);
```

6. After that copy project files in directory C://xampp/htdocs
7. After that open you browser and go to localhost/{project-folder-name}

Enjoy
